MCDI SECURITHOR Plugin – Dahua Integration for SECURITHOR V2

Additional Module for Video Verification, IP Alarm Reception and Bidirectional Control for Monitoring Centers

LICENSE DESCRIPTION

He**MCDI SECURITHOR plugin – Dahua (SKU: STDA)**It is a software license designed for Alarm Receiving Centres (ARCs) and monitoring centers. This module allows for the native integration of the brand's devices.**Dahua Technology**(DVRs, NVRs, IP Cameras and Dahua AirShield Alarm Systems) directly within the event processing interface of**SECURITHOR V2**It allows you to automatically switch to live video upon an alarm event, receive PUSH/DMSS notifications with verification clips, and manage remote commands without leaving the monitoring system.

MAIN FEATURES

• **Automatic Video Verification:**Opens pop-up windows with live video streaming on the operator's workstation upon receiving an alarm signal.

• **Integration with Dahua AirShield:** Direct reception of panic events, mobile panic and intrusion alarms with geolocation data.

• **Bidirectional Panel Control:**It allows for remote arming, disarming, and activation of relay outputs directly from the SECURITHOR service ticket.

• **Replay of Events Degrees:**It allows you to view the recording immediately before and after the event activation on Dahua NVR/XVR recorders.

• **Simplified P2P/IP Connection:** Compatible with Dahua SDK and direct P2P integration, reducing the need for complex port forwarding.

• **x64 Architecture Optimization:** Fully compiled for 64-bit versions of SECURITHOR V2, offering high performance and immediate response.

SPECIFICATIONS AND LICENSING REQUIREMENTS
