Using the AM mount adapter 314
and compatible accessories

Pole mount installation

Here is a general sample procedure with a pole mount bracket:

1. Route power lines and other cables through the included cable gland, route them through conduit (purchased separately), and install the cable gland on the pole mount bracket.
2. Locate the position where you want to install the pole mount bracket and camera. Unroll the stainless steel straps, thread them through the openings on the sides of the bracket, and then tie around the post. Use a pliers and flat-bladed screwdriver to secure the bracket to the post.
3. Fill any unused screw holes with the included silicone plugs.
