

## Technical sheet

Spark plug cable or double insulated 20 meters

CB20M

|                           |                      |
|---------------------------|----------------------|
| Maximum withstand voltage | 12,000 V             |
| Insulation material       | Sprayed Polyurethane |
| Cover material            | PVC                  |
| Caliber                   | 22 AWG               |
| Insulation thickness      | 3.5 mm               |
| Cover thickness           | 1.04 mm              |
| Insulation temperature    | 70 - 90 °C           |
| Conductor material        | Tinned copper        |
