

DH-MPT230

Dahua Body Camera

Series Overview

With its ergonomic design, the Body Camera is both easy to carry and convenient to use. By just the press of a button, it can take pictures, and record videos and audios while an event is occurring, and directly upload recording files to the Data Collection Station or platform. Through the 4G network, it can also cooperate with the platform to perform functions such as live video, group talk and alarm event handling.

Functions

Wide-angle View

With its 146° ultra-wide-angle lens, the device offers a broader range for capturing images.

OSD Information

The OSD displays the time, user, device, task and GPS information. Two pieces of OSD information can be customized.

Capture the Truth in Any Situation

With a simple press of a button, the device effortlessly records videos and audios, and captures images to preserve crucial information of any given event.

Interaction with the Control Center

When working with the Dahua platform, the device can send alarm and GPS information and perform PTT voice talk through one button, making it convenient for officers to communicate with their headquarters in real time.

- Comes with an 8-core 2.0 GHz high-performance processor and the Android 11.0 system.
- Built-in 64 GB internal storage and supports expanding storage to 256 GB.
- 2.4-inch capacitive touchscreen
- Supports dual streaming and H.265/H.264 video compression.
- Video resolution up to 2560 × 1440 and image resolution up to 49 MP (9408 × 5292).
- Includes an LED light and IR light for clearer videos and images in dark locations.
- The IR light can be automatically or manually switched on, making outlines within 10 meters clearly visible.
- Advanced EIS algorithms that allow the device to take clear and stable images when it is in motion.
- Advanced AES-256 encryption technology for video recording.
- Supports self-adaptive network streaming, and adjusting the stream according to the network conditions to ensure smooth video preview.
- Offers AI functions such as face detection and license plate recognition.
- Supports 2G, 3G and 4G cellular networks, Wi-Fi, Bluetooth and using GPS and GLONASS positioning.
- Supports the automatic calibration of the time through the platform, satellite, or cellular network.
- It is IP68 rated, and received rigorous testing with four 2-meter drop tests.

Emergency Handling

In the event of an emergency, pressing the SOS button will promptly send alarms to the platform. The emergency can also be conveniently reported on directly from the scene using the audio talk function. After the emergency is received, the platform will swiftly dispatch necessary personnel to the GPS location displayed on the map, prioritizing the safety of individuals on-site.
