

TROPICALIZED TENSIONER

Tropicalized tensioner for use in electric fences.

Designed to be placed on any section of an electric fence. Its construction provides high resistance to corrosion and environmental factors, guaranteeing its durability, and its design allows for easy installation on the electric fence.

Technical Specifications:

- Made of material of aleación Zinc “zamac”.
- High resistance to corrosion and the environment.
- Bright electrolytic tropicalized finish.
- Eye and hook made of polished 10 gauge wire and UNC thread. Hard chrome plated with 18 thousandths. Maximum tensile strength: 70 Kg. Maximum electrical resistance: 0.4 Ohm.
