

## Technical Specifications:

# IHORN HC-05-LED Strobe Red Color

The IHORN HC-05-LED is a safety strobe light designed for indoor hardwired installation. Its primary function is to provide a visual alert through high-intensity LED flashes, facilitating the location of an alarm event silently or as a complement to a siren.

## Technical Specifications

This product is used to connect to a system with a relay output so that it can be activated and visually indicate the alert or operation event.

- Flash Frequency: Between 90 and 150 flashes per minute (depending on the voltage).
- Type: Strobe light
- Nominal current (mA): ≤200
- Material: ABS plastic.
- Installation: Surface mounting (wall or ceiling) using screws.
