Technical Specifications:

AV GMX007 - Metal Cabinet for Control Panel or Expansion Modules (PC5002C)

The AV GMX007 is a professional enclosure designed for the secure and organized housing of control panels and expansion modules. Constructed from high-quality steel, this enclosure provides a physical barrier against tampering and unauthorized access, while optimizing space for cabling and a backup battery.

Technical Specifications

- either**Robust Construction:**Made of high-strength steel to protect the core components (panels and modules) against physical damage and unauthorized access.

- either **Standard Compatibility:**Design based on the PC5002C format, ideal for DSC panels (PowerSeries/Neo) and universal expansion modules.

- either **Optimized Space Management:**Dimensions designed to internally house a backup battery of up to 7Ah/12V and organize the wiring neatly.

- either**Anti-sabotage security:**Includes preparation for tamper switch mounting, allowing the system to generate an immediate alert if the door is opened.

- either **Installation Flexibility:**Equipped with multiple knockouts to facilitate the entry and exit of pipe or wiring from any angle.

- either**Dimensions:**Height 23.8 cm, width 21 cm by 7.7 cm depth.
