Metal Enclosure for 30 Watt Outdoor Siren

Model: AV TT001

Metal enclosure, ideal for housing a 30-watt siren (Model: SD30W). Made of sheet steel, making it highly resistant and suitable for outdoor installations.

Characteristics:

- It has preparation for installing two tamper switches (not included), one to alert when the lid is opened and the other will alarm when the cabinet is removed from the wall.
- The lid closes with a couple of screws.
- It has perforations for routing cables to the outside of the cabinet.
- Material: Steel.

Specs:

- Removable outer cover.
- Material: Steel sheet
- Dimensions: (Height x Width x Depth) 23 x 27 x 17 cm.

Recommendations:

- It is recommended that the side of the grate face downwards to prevent the accumulation of particles. Ensure that the installation is carried out by a trained professional.
- Check periodically that the screws are properly tightened.
- Schedule a maintenance plan to remove excess dust and dirt from the equipment. Additional notes: Avoid installing the cabinet in locations exposed to water jets, for greater siren safety.
