

Operating manual:

AJAX – Holder - Support for fixing the button to the surface.

The bracket's design doesn't compromise the button's ergonomics and provides a secure fit. It can be attached to a surface with two screws or double-sided tape; thanks to the large, flat surface, even this installation method is reliable. The Button and DoubleButton can be inserted and removed from the bracket in a single motion. No tools or wasted time are required.

Device compatibility

- Button Jeweller
- Superior Button Jeweller
- DoubleButton Jeweller

Mounting with double-sided adhesive tape (Fast)

- 1.**Cleaning:**Clean the mounting surface with isopropyl alcohol to remove grease or dust.
- 2.**Preparation:**Peel the protector off one side of the adhesive tape and stick it to the flat back of the Holder.
- 3.**Fixation:**Press the Holder firmly against the desired surface for 30 seconds. **Note:**This method is recommended only for smooth surfaces (glass, metal, melamine).

Screw mounting (Recommended)

- 1.**Disassembly:**Remove the Button from the Holder if it is already in place.
 - 2.**Drilling:**Use the Holder as a template to mark the two fixing points on the wall or wood.
 - 3.**Anchorage:**Screw the bracket in place using flat-head screws that are suitable for the surface material.
