

User Manual

Base for DAHUA DHI-HY-ANDZ Manual Station

1. Introduction

The DAHUA DHI-HY-ANDZ manual station base is designed to simplify the installation of manual stations. Its integrated connector in the structure guarantees a fast and secure connection, optimizing installation and maintenance time.

2. Package Contents

When you open the package, make sure you find the following items:

- 1 DAHUA DHI-HY-ANDZ Base
- User manual
- Warranty certificate

3. Product Description

The DHI-HY-ANDZ base has the following characteristics:

- Compact and durable design: Made with highly durable materials.
- Integrated connector: Facilitates the assembly and disassembly of manual stations without the need for additional tools.
- Universal Compatibility: Compatible with most Dahua and other standard brand manual stations.

4. Technical specifications

Feature	Specification
Material	ABS
Dimensions	90mm × 90mm × 18.5mm
Weight	27 g
Operating temperature	- 10 °C to +55 °C
Connection	Integrated universal connector

5. Installation instructions

Step 1: Preparing the area

1. Choose a suitable location to install the base, making sure it is accessible and visible.
2. Make sure the surface is clean and free of dust.

Step 2: Fixing the base

1. Use the included mounting kit to attach the base to the desired wall or surface.
2. Make sure the screws are tight to prevent movement.

Step 3: Connecting the manual station

1. Connect the manual station to the integrated connector on the base.
2. Make sure the connection is secure before placing the station in place.

Step 4: Functionality testing

1. Verify that the manual station functions correctly once installed.
2. Perform tests according to the instructions for the connected device.

6. Maintenance and care

- Clean the base regularly with a dry cloth.
- Periodically check that the mounting screws are secure.
- Inspect the connector to ensure there is no corrosion or damage.
