

## CAB PAIR

### ELECTRIC FENCE CABLE

Double-insulated conductor for connecting high-voltage electrical power from an energizer to an electric fence.

Thanks to its insulation, it can be handled during installation or maintenance, containing the high voltage inside and thus avoiding the risks of accidental discharge.

#### Technical Specifications:

- 7 Conductors per cable
- Tinned Copper
- Silicone and polypropylene insulation
- Flame retardant PVC cover.
- UV protection treatment
- Gauge: 22 AWG
- Insulation thickness: 3.5 mm
- Cover thickness: 1.04 mm
- External diameter: 5.55 mm
- Insulation temperature: 70° - 90° C
