

IQ Battery - QR0119-840

Factory replacement battery for IQ Remote PG and first generation IQ Hub.

Model / Product No.	QR0119-840
Application	IQ Remote PG and IQ Hub Gen 1
Nominal voltage	3.7 V
Energy	10 Wh
Ability	3000 mAh
Type indicated in guide	ICR 18650

Description

The IQ Battery is the factory replacement designed to maintain backup power for the IQ Remote PG remote control and the first-generation IQ Hub. It must be installed respecting the polarity and following the manufacturer's replacement procedure.

Basic replacement procedure

- 1. Turn off the panel.** Enter Advanced Settings with the authorized code and select "Turn Off".
- 2. Remove the battery door.** Separate the panel from the backplate or table stand and remove the cover screw.
- 3. Remove the battery.** Use the fabric tab located under the battery to remove it.
- 4. Install the new battery.** Check the polarity and leave the fabric tab under the battery to facilitate future removals.
- 5. Close and assemble.** Reinstall the door, the screw, and place the equipment back on its plate or stand.

Safety warnings

Do not use screwdrivers or sharp objects that could puncture the battery. Do not disassemble, incinerate, or heat above 60°C. The manufacturer's guide indicates replacement only with GUANGZHOU GREAT POWER ENERGY & TECHNOLOGY CO., LTD., model ICR 18650. Dispose of the used battery immediately and keep it out of reach of children.
