DESIGNED TO BE SIMPLE, BUILT TO PERFORM

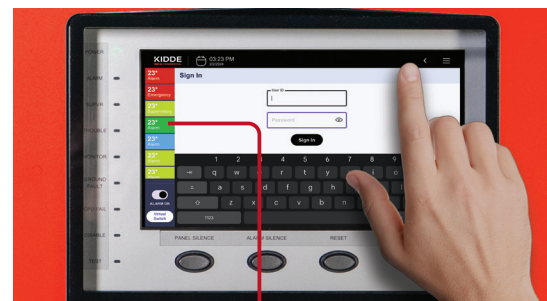

Simplicity is one of the hardest things to engineer, which is probably why so many fire systems are overly complicated. The new Evolve Series from Kidde Commercial has been engineered to be advanced where it matters, and simple where it counts -- from installation through maintenance and operation.

DESIGNED FOR THE USER

Just tap and go – with its familiar tablet-like screen, all the important functions are fewer clicks away. Whether you're a technician or facility staff, you can avoid the hassle of searching through endless menus. And when a site grows into a multi-panel system, peer-to-peer networking preserves that same simple experience with system-wide control across the network.

SIMPLE & INTUITIVE TOUCHSCREEN

10" LCD touchscreen can display up to 8 events without scrolling, and can be customized with a company logo.

Accessing reports now requires 40% fewer clicks.

Programmable LEDs with 5-color options means lower costs.

POWER MEETS POSSIBILITY

The Evolve Series is built for expansion, so you can scale and customize your system to your evolving needs.

SCALABLE SYSTEM

Network up to 24 panels. Each panel can accommodate up to 4 loops, each with 250 addressable devices, 30 remote annunciators, and fully programmable switches – 6 standard virtual switches, up to 72 physical switches, and 5-color LED options.

READY TO NETWORK AND GROW

Evolve now meets the requirements to be specified for projects that require peer-to-peer networking, with panels working together as a unified system to support larger, multi-panel designs while keeping system wide command, control, and visibility consistent across the site.

PEER-TO-PEER NETWORKING (UP TO 24 PANELS)

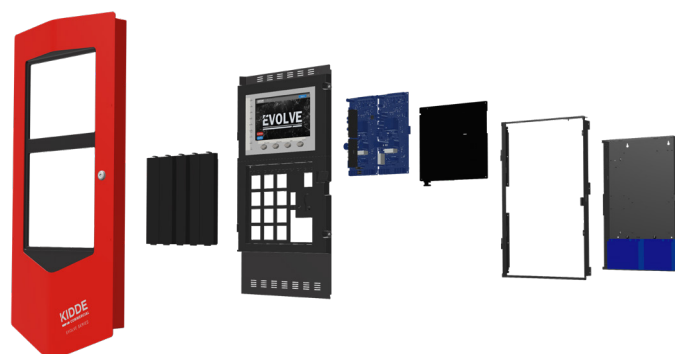

Mixed-media networking lets you choose Ethernet, copper, or fiber to optimize distance, cost, and performance—supporting everything from short in-building runs to long-distance connections.

UPGRADE WITHOUT OVERHAULING

Designed for backwards compatibility, the Evolve Series works with existing initiating and notification devices, wiring, and backboxes from VS2 and VS4 systems to save you money and minimize downtime, while delivering consistent protection.

RETROFIT KIT

Beyond working with existing devices and wiring, the kit eliminates the need to replace the existing backbox, buy new cabinets, disturb existing pipe and wire, or repair walls.

SMARTER INVESTMENT

With networking, simplified wiring, programming software, and a powerful 10-amp power supply featuring Voltage Boost™, the Evolve Series reduces expensive material and labor costs.

ELIMINATE EXTRA PURCHASES

Supports longer wire runs than traditional notification circuits, with smaller gauge wire, and without the need for added booster power supplies. Built-in Ethernet eliminates the need for a Network Interface Card, reducing the overall cost of deploying a networked system.

THE COMPLETE SYSTEM DESIGNED FOR SIMPLICITY

When we designed the Evolve Series, we made sure the system works smarter.
The result is standout protection that's remarkably simple to set up and maintain.

REDUCED NUISANCE ALARMS

Optica™ Detectors differentiate between nuisance particles like cooking smoke, dust, or steam and serious threats

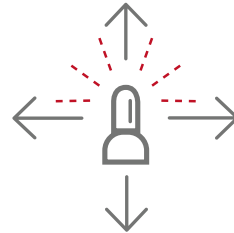

EASE OF SERVICING

Electrical Mapping automatically ties detector and module serial number to a visual map for ease of installation and servicing

ENERGY EFFICIENT. POWERFUL PERFORMANCE.

As the most energy-efficient appliances in their class, the Genesis™ LED series notification devices enable use of smaller gauge wire to save on installation costs

EVEN MORE FLEXIBILITY

13+ selectable notification appliance circuit configurations for use in a variety of settings, from hotels to garages

REMOTE VISIBILITY. REAL-TIME EFFICIENCY.

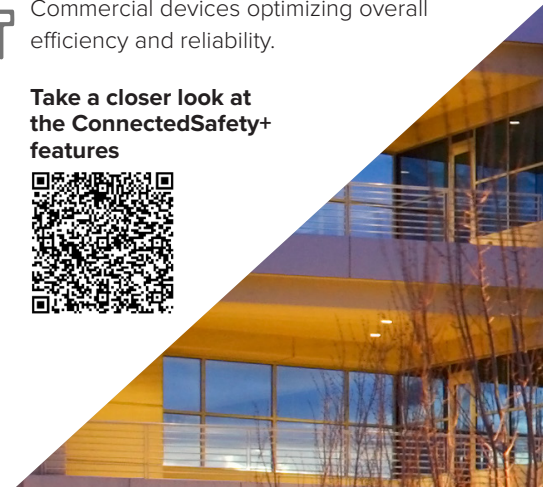

With the Cellular Gateway, get access to ConnectedSafety+ and CMS getting you the connectivity and network reliability you need when it matters most.

BENEFITS OF CONNECTEDSAFETY+

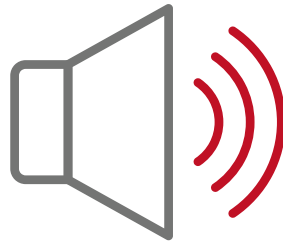

Gain remote access to the Evolve Series Fire Alarm Systems and connected Kidde Commercial devices optimizing overall efficiency and reliability.

the ConnectedSafety+
features

WHAT'S NEXT: INTEGRATED VOICE SYSTEMS

The Evolve Series will soon offer pre-recorded and live voice evacuation broadcast capabilities through upcoming software updates.

INTEGRATED VOICE SYSTEMS

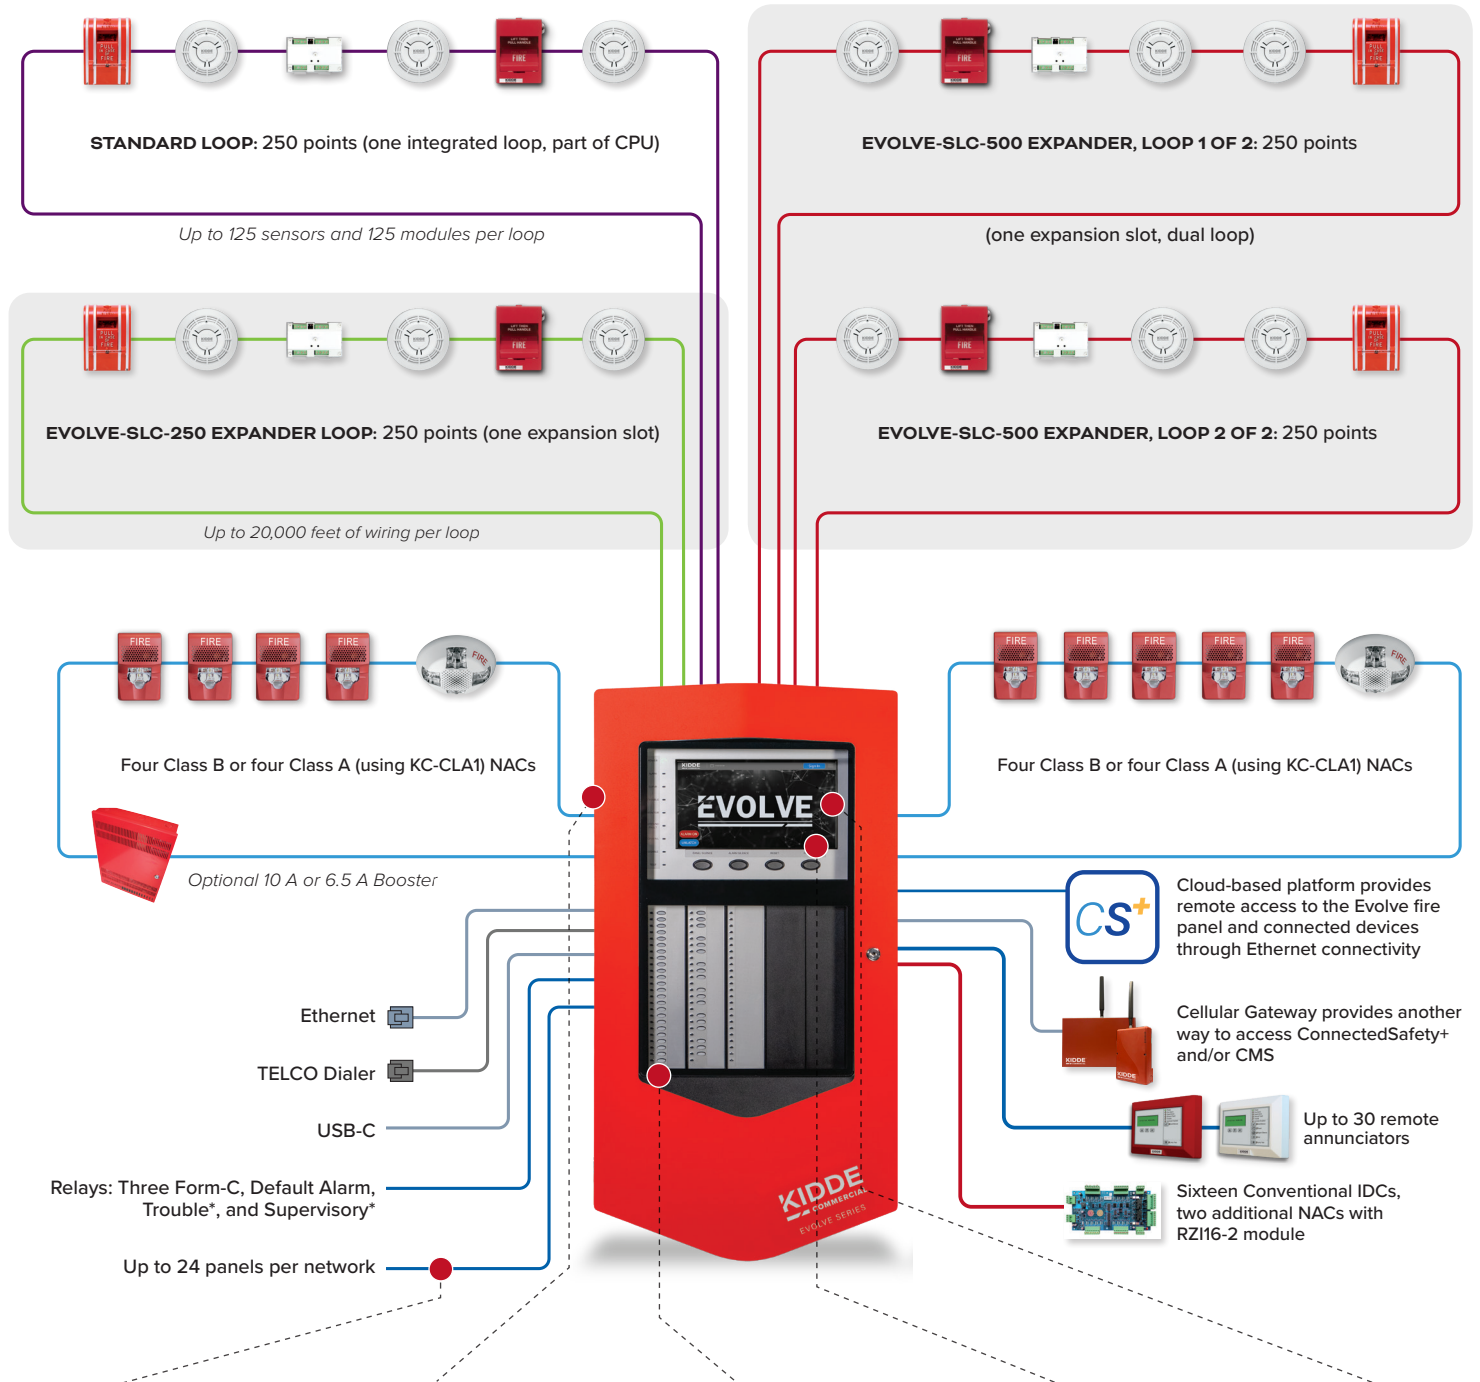

The upcoming audio capabilities of Evolve will offer a cost-effective pass-through of the audio data over the same pair of wires as panel network data.

ROOM TO GROW, READY TO ADAPT

Today's needs are just the beginning. The Evolve Series grows alongside you, with the capacity to expand and adapt as your facility changes. All while maintaining the same straightforward operation.

Expandable to three single- or one single- and one-dual device loop modules

Flexible media options: Ethernet, fiber, or copper

10 Amp switching power supply featuring Voltage Boost™

Up to 72 programmable physical switches and 5-color LED options

6 standard virtual switches

10" touchscreen display

A modern multi-story building with large glass windows and balconies, illuminated from within, set against a dark sky at dusk. The building is the central focus of the image, with a red diagonal graphic element in the bottom right corner.

POWERFULLY SIMPLE. SIMPLY POWERFUL.
