

TECHNICAL DATA SHEET

DSC / Sur-Gard SG-SYS21536IP - SG-System II License to Enable a Second Table of 1,536 IP Accounts

Description

The **SG-SYS21536IP** is a software license for the **SG-System II** that enables a **second IP account table**. According to the manual, when a valid license is entered, the system enables a table independent from the first one and adds capacity for **1,536 additional IP communicators**, of which up to **512 can be supervised**.

Feature	Information documented in the manual
Model	SG-SYS21536IP
Product type	Software license / IP capacity expansion
Compatible system	SG-System II
Function	Enables the second IP account table
Additional capacity	1,536 additional IP accounts / communicators
Additional supervised accounts	Up to 512 in the second table
Capacity per table	Maximum 1,536 accounts per account table
Supervised accounts per table	Maximum 512 supervised accounts per account table
Resulting total capacity	Maximum 3,072 IP accounts when both tables are enabled
Table independence	The second table is independent from the first account table
Activation	Through Product ID Key options [037] and [038]
Related configuration	The manual references option [148] (Alarm Port 2) and option [14A] (Line Card Number Port 2)
Restart required	After entering and accepting the license key, the SG-System II must be restarted for the changes to take effect
UL/ULC restriction	For UL/ULC listed applications, the manual states a maximum of 512 supervised accounts

Activation Procedure

1. Go to Product ID Key options **[037]** and **[038]**.
2. Press ENTER to display and edit the current value.
3. Enter the license key using the UP/DOWN buttons and confirm each digit with ENTER.
4. Accept the changes when prompted on the LCD.
5. Restart the SG-System II for the license to take effect.

Note

The commercial model code **SG-SYS21536IP** was provided by the user. The consulted manual documents the license function and second account table capacity, but does not explicitly show this commercial model code.
