

TECHNICAL DATA SHEET

DSC / Sur-Gard SG-CPM5-AUTO - TCP Automation Port Enablement License for SG-System 5

Description

The **SG-CPM5-AUTO** is an upgrade license for the **SG-CPM5** module used in the **SG-System 5**. Its function is to **unlock additional TCP automation ports**, specifically ports **2, 3, or 4**. This expands the system's automation connectivity options for central station software.

Feature	Documented information
Model	SG-CPM5-AUTO
Product type	Upgrade / automation enablement license
Compatible system	SG-System 5
Associated module	SG-CPM5
Main function	Unlocks additional TCP automation ports
Available ports	TCP automation ports 2, 3, or 4
Maximum per CPM5	Up to 3 additional TCP automation ports per SG-CPM5, corresponding to ports 2, 3, and 4
Application	Integration with central station automation servers or software
Functional benefit	Provides greater flexibility and redundancy for TCP automation outputs
Expansion type	License-based functionality; no additional physical hardware is added
Related product	SG-CPM5 - central processing module for SG-System 5

Considerations

- The documentation identifies the **SG-CPM5-AUTO** as the license used to unlock TCP automation ports **2, 3, or 4**.
- SG-System 5 supports multiple automation ports and redundancy/flexible automation output operation. This license expands the available TCP automation ports on the CPM5.
- The consulted documentation does not specify an activation procedure, license-key format, expiration term, electrical consumption, or physical specifications for this license. No undocumented data has been added.

Part Number Note

The source documentation uses the part number **SG-CPM5-AUTO**. The designation **SGCPM5AUTO** refers to the same part number written without hyphens.
