

OPERATION MANUAL

TVC MATPRO058 - Black Drawstring Backpack with DSC Logo

1. Product Identification

Product marketed by TVC as a black backpack-style bag with drawstrings and DSC logo. Published model: **BolsaDSC**.
TVC part number: **DSC3010002**. SAT code: **24111501**.

2. Scope of This Manual

The consulted TVC product page does not publish a manufacturer-specific operation manual for this item. Therefore, the following instructions are **general recommendations for the use and care of a drawstring backpack** and are clearly distinguished from the official information published by TVC.

3. Basic Use

1. Place items inside the bag and distribute the weight as evenly as possible.
2. Avoid placing objects with exposed sharp edges or points that could damage the bag.
3. Use the drawstrings to carry the bag over the shoulders in a stable manner.
4. Position the drawstrings, when the design allows, so the load remains close to the body.
5. Remove all items before storing the bag for extended periods.

4. Safety Recommendations

- Do not overload the bag. The product page does not publish a maximum load rating.
- Do not use the drawstrings to lift or secure heavy loads beyond normal bag use.
- Do not carry sharp tools or pointed objects unless they are properly protected.
- Keep the bag away from direct heat sources, flames, and surfaces that may damage it.
- Do not allow loose drawstrings to become caught in machinery, doors, or vehicles.

5. Cleaning and Care

- Remove surface dust with a dry or slightly damp cloth.
- Do not use solvents, bleach, or aggressive chemicals unless the construction material is known to be compatible.
- If the bag becomes wet, allow it to dry completely before storage.
- Avoid ironing or applying direct heat to the logo.

6. Storage

Store the bag empty, clean, and dry, preferably in a ventilated location away from moisture, prolonged direct sunlight, and heat sources.

7. Inspection Before Use

Visually inspect the drawstrings, seams, and bag body. If there is visible damage that could cause the contents to fall or a drawstring to detach, discontinue use.

8. Information Limitations

TVC confirms the commercial identification, brand, model, color, drawstrings, and DSC logo. It does not publish construction material, capacity, maximum load, washing instructions, or resistance specifications. Therefore, this manual does not assign values or properties that are not documented.

9. Product Data
