www.wejoin.com.cn

Description

4-meter articulated octagonal boom, composed of two sections (2 m + 2 m), specifically engineered for installations with ceiling height restrictions. Its 90° articulated mechanism allows the boom to fold vertically as it raises, optimizing space in low-clearance environments. Features integrated LED lighting to enhance night visibility and safety. Dimensions measure 4.5 cm in width by 10 cm in height. Designed for seamless integration with WEJOIN vehicular barrier gates in parking

Specifications

1. Length: 2 m + 2 m (main barrier + safety barrier)
2. Arm Width: 4.5 cm
3. Arm Height: 10 cm
