User Manual

AJAX Equipment Demo Briefcase - Without Demonstration Devices

1. Product Description

The AJAX equipment demonstration briefcase is designed as a support tool for sales and presentations during customer visits. Its interior allows devices to be organized neatly, providing an elegant and professional presentation.

2. Intended Use

Use the briefcase to transport and present AJAX equipment during commercial demonstrations. The provided technical data sheet indicates that this model is supplied **without demonstration devices**; therefore, any equipment placed inside must be added separately.

3. Preparing for a Presentation

1. Open the briefcase on a stable surface.

2. Place the demonstration devices in the interior spaces intended for organization.

3. Visually check that the equipment is properly arranged before transporting or presenting the briefcase.

4. During the presentation, keep the devices identifiable and accessible to facilitate the explanation to the customer.

4. Usage Recommendations

Based on the function described in the technical data sheet, the briefcase is recommended primarily for organization, transportation, and commercial display. Avoid placing objects inside that do not match the available spaces or that could damage the devices stored in the briefcase.

5. Specifications

Classification	Demonstration briefcase
Color	Black
Contents	Demo briefcase without demonstration devices
Application	Sales and presentations during customer visits

6. Important Note

The provided technical data sheet does not include an official manufacturer user manual or specific instructions regarding maintenance, closure, load capacity, or dimensional compatibility. This document was prepared in English solely from the information available in the data sheet and the demonstration function it describes, without adding undocumented technical specifications.

Document prepared from the technical data sheet supplied by the user.
