Description

The WJLBM45 is a 4.5-meter straight LED arm, 10 cm wide, designed for integration with 3-second rapid-opening vehicle barriers. It is manufactured with high-strength materials, providing reliable and durable operation in continuous-use and high-traffic access areas. It features integrated LED strips that improve arm visibility, especially at night or in low-light conditions. It also includes a slot for installing impact-absorbing rubber, designed to reduce the risk of vehicle damage in case of accidental contact during barrier closing. To enhance signaling and visibility, the arm includes red reflective tape, making it easier to identify from a greater distance and improving access safety.
