

TECHNICAL DATA SHEET

QOLSYS IQCard 319 MHz

Wireless receiver card for legacy 319.5 MHz sensors

Product Identification

Brand:	QOLSYS
Model:	QC0001-840
TVC Code:	QLS1200002
SAT Code:	46171619
Warranty:	12 months

Description

The IQCard 319 MHz adds compatibility with legacy 319.5 MHz SRF sensors to compatible fourth-generation IQ panels. The card is installed internally in the slot specified by the manufacturer.

Technical Specifications

Product type	Wireless receiver card
Frequency	319.5 MHz
Function	Compatibility with legacy SRF sensors
Compatibility	IQ Panel 4 / IQ4 Hub / IQ4 NS
Installation slot	Slot 3
Antenna	White SRF antenna
Installation	Internal pin connection
Mounting	Locking screw included

Installation Considerations

- Completely power down the panel before installing or removing the card.
- Disconnect the power supply before installation.
- Install the IQCard in Slot 3 of the compatible panel.
- According to TVC, the internal battery does not need to be disconnected during this procedure.
