

TECHNICAL DATA SHEET

SECO-LARM SS-078-KEYQ

Replacement key for latching panic buttons

Brand	SECO-LARM
Model	SS-078-KEYQ
Type	Replacement key / reset key
Function	Resets the latching mechanism of compatible panic buttons
Compatibility	SECO-LARM SS-077Q and SS-078Q
Electrical operation	Not applicable; mechanical accessory

Description

The SS-078-KEYQ is a replacement key designed by SECO-LARM for the SS-077Q and SS-078Q latching panic buttons. Its purpose is to mechanically release and reset the button after activation, allowing the device to return to its normal condition once the alarm event has been addressed.

Key features

- Original replacement key for SECO-LARM latching panic buttons.
- Compatible with models SS-077Q and SS-078Q.
- Allows manual reset after button activation.
- Fully mechanical accessory; no electrical power required.
- Suitable as a replacement or spare key for existing installations.

Technical compatibility

Compatible model	Contact / button operation	Switch type
SS-077Q	N.C. - press to open	SPST
SS-078Q	N.O. - press to close	SPST

Associated device data - SS-078Q
