ZKTeco

Guía Rápida

CR10MF

The CR10 series are accessories designed to read (CR10E / M) and write (CR10M / W) proximity cards. CR10M / W includes communication protocol for development and is compatible with Windows 32-bit OS. CR10E and CR10M are compatible with all types of OS windows and read the same serial number as ZKTeco devices.

What is it for?

Its operation is to read proximity cards. It allows high speed transactions and incorporates LED indicators.

How does it work?

It must be connected to the PC through the USB port (plug & play).
