TECHNICAL DATA SHEET

SECURITHOR CAM ULTRA

Video verification software add-on for alarm receiving centers

CAM Ultra is an optional SECURITHOR module that extends video verification tools and integrations with compatible security devices and services. It can associate alarm events with video feeds and provide visual evidence during alarm handling.

PRODUCT IDENTIFICATION

Manufacturer	MCDI Security Products Inc.
Product	SECURITHOR CAM Ultra (CAMULTRA)
Category	Software license / add-on module
Distributor reference	TVC product 72615 (MCD2550007, per consulted reseller listing)
Application	Alarm receiving centers / central monitoring stations

DOCUMENTED CAPABILITIES

Alarm-to-camera mapping	Associates an alarm code or zone with a camera or channel, with automatic opening when configured.
Video recording and snapshots	Viewer can capture recordings and snapshots associated with the alarm event.
Pre-alarm video	Retrieves footage preceding the alarm when supported by the device.
Reference images	Compares the current view against reference pictures.
Camera controls	Viewers provide PTZ, zoom, focus, iris and, for certain devices, relay control.
Integrations	SDKs and connectors for compatible devices, analytics systems and services.
Links and protocols	May open HTTP, RTP, RTSP links or external applications depending on integration.

OPERATIONAL WORKFLOW

1. The security system generates and transmits an alarm.
2. SECURITHOR identifies the account, code or zone.
3. CAM Ultra presents the associated camera if configured and supported.
4. The operator reviews video and records evidence and response actions.

DOCUMENTED INTEGRATION EXAMPLES

The manufacturer catalog lists integrations involving Dahua, Hikvision, EPCOM, Ajax, Alarm.com, Vivotek, IDIS, TVT, Uniview, Bosch CBS, Davantis and OPTEX CHeKT. Availability varies by device, firmware, connectivity method and additional licensing.

REQUIREMENTS AND LIMITATIONS

- CAM Ultra is not a physical alarm receiver and does not replace the core SECURITHOR software license.
- Feature availability varies by manufacturer and device model.
- Some integrations require extra modules (such as CAM+ or STC), third-party services or subscriptions.
- Confirm SECURITHOR version compatibility, licensing and installation requirements with MCDI before ordering.
- No universal camera-count limit for this specific license was established in the reviewed manufacturer material.
