OPTIONAL MONITORING SOFTWARE ADD-ON

SECURITHOR MVP

MAP VIEW · FLOOR PLANS

SECURITHOR MVP (Map View and Plans) provides an interactive geographical view of monitored premises and access to site- or partition-associated plans, adding context to intrusion and fire alarm response.

PRODUCT IDENTIFICATION

Manufacturer	MCDI Security Products Inc.
Product / model	SECURITHOR MVP / MVP1
TVC item code	MCD2550008
Product type	SECURITHOR optional software add-on license
Typical use	Monitoring centers, industrial and institutional security

VERIFIED CAPABILITIES

Live Map	Interactive site/alarm markers with visual indication of alarm types and armed/disarmed states.
Site floor plans	Access to multiple plans for floors, access routes, zones, surrounding areas and exits.
Fire response context	Location of pull stations, detectors, fire extinguishers, hydrants and evacuation assembly points.
Cameras on plans	Camera coverage may be plotted; launch the camera viewer from a plan where the integration supports it.
Complementary tools	Preset regional views; Click-to-Dial and Mission Control Board interactions when relevant components are available.

SYSTEM REQUIREMENTS & COMPATIBILITY

Software version	TVC states SECURITHOR 2.6.1 onward; the MCDI 2026 catalog describes MVP for v2.40 onward. Confirm feature-level compatibility before ordering.
Operating system	Windows 10 Pro; 64-bit Windows 11 Pro preferred (Spanish technical catalog).
Recommended map hardware	Quad-core i7 CPU, fast GPU with 8 GB dedicated video memory, 16 GB RAM or more.
Storage	SSD write speed above 1,000 MB/s.
Map scale	Catalog guidance recommends fewer than 5,000 points per map with a high-speed CPU/GPU.

OPERATIONAL WORKFLOW

- 01 SECURITHOR receives an alarm
- 02 MVP identifies the site on the live map
- 03 The operator opens a plan and finds the device
- 04 The operator verifies context and follows response procedures

IMPORTANT CONSIDERATIONS

- MVP is not intended for high-volume alarm signal processing; use SECURITHOR traffic views for this purpose.
- Map visualization requires an active SECURITHOR support plan according to MCDI documentation.
- Plan detail depends on the information entered and configured; cameras, call tools and staff dispatch may require separate modules or integration.
