TECHNICAL DATA SHEET

SECURITHOR PUSH1 | PUSH NOTIFICATIONS

P1WST1 · Annual end-customer notification service

Push1 sends notifications about events received by SECURITHOR to end customers through the VERIFICATHOR mobile application. This is a one-way communication service: recipients receive alerts but cannot acknowledge or cancel alarms through this service tier.

PRODUCT IDENTIFICATION

Manufacturer	MCDI Security Products Inc.
Commercial name	SECURITHOR P1WST1 – Push Notifications
Model / TVC code	P1WST1 / MCD2550010
Product category	Annual subscription-based PUSH notification service
Receiving application	VERIFICATHOR for iOS and Android
Source platform	SECURITHOR alarm monitoring software

DOCUMENTED FEATURES

Customer alerts	Notifications of signals received by the alarm monitoring center.
Selective delivery	Recipient configuration by account and alarm event code.
Recipients	TVC states up to 48 recipients per alarm code.
Custom messages	Information updates, reminders, and general notices can be sent.
Station branding	VERIFICATHOR can show the central station logo, telephone and WhatsApp.
Multilingual application	TVC advertises 21 languages and iOS/Android compatibility.
No alarm response	Push1 is one-way only; it does not enable in-app alarm acceptance or cancellation.

OPERATION FLOW

Alarm event → SECURITHOR → MCDI PUSH service → VERIFICATHOR application → end customer. The app can provide call or WhatsApp shortcuts to the monitoring center, without making Push1 a two-way alarm verification service.

REQUIREMENTS AND CONDITIONS

- TVC lists compatibility starting at SECURITHOR 2.6.1; check the installed software version and available features.
- A stable, continuous internet connection is required for the notification service; delivery also depends on phone connectivity and notification permissions.
- The service must be renewed annually. Verify activation, support coverage and renewal terms with MCDI.
- Push1 is not the same as two-way or image-based VERIFICATHOR verification; those service tiers require separate confirmation and licensing.
- TVC indicates processed digital licenses are non-returnable.
