SECURITHOR VERIFICATHOR

Interactive alarm verification for monitoring center subscribers

PRODUCT IDENTIFICATION

MANUFACTURER / FABRICANTE	MCDI Security Products Inc.
MODEL / MODELO	VerifST1
TVC SKU / CLAVE	MCD2550011
CATEGORY / CATEGORÍA	Software add-on / Alarm verification service
SAT CODE / CLAVE SAT	81111812

PRODUCT OVERVIEW

VerifST1 links the VERIFICATHOR service with SECURITHOR to notify Alarm Receiving Center (ARC) subscribers and let them confirm or cancel alarm events using a mobile app. It is designed to help reduce false alarms and improve event handling.

DOCUMENTED FEATURES

- Two-way verification: Subscribers can confirm or cancel an alarm in the app; their response is conveyed to the ARC.
- Configurable timer: The ARC may set a response window and optionally allow subscribers to request extra time.
- Notifications: Alarm alerts and customized customer messages from the monitoring center.
- Branding options: Company logo, telephone number and WhatsApp contact displayed in the app.
- Account-level delivery: Multiple recipients per account; configurable notifications according to alarm type.
- Mobile support: VERIFICATHOR application for Android and iOS devices.

WORKFLOW

1. SECURITHOR receives an alarm	2. VERIFICATHOR alerts subscriber	3. Subscriber confirms or cancels	4. ARC follows its response procedure

REQUIREMENTS & LICENSING

Platform	SECURITHOR with active VERIFICATHOR module/service.
Version	TVC states SECURITHOR 2.6.1 onwards; later features may require an update.
Connectivity	Stable continuous Internet access to notification services.
Provisioning	STnet provisioning for ARC identification.
Term	Annual service; confirm scope, renewal and pricing with supplier.
Image verification	Visual proof only with selected compatible integrations/plans; not universal.

KEY DISTINCTION: unlike P1WST1 / Push1 (one-way alerts), VerifST1 supports subscriber confirmation or cancellation. Dispatch decisions remain subject to each ARC's operating procedures.
