

UTEPO

Operation manual of model UTP101 P- HD6

* Please read these instructions before using this product .

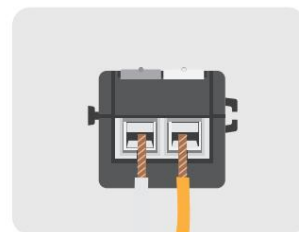

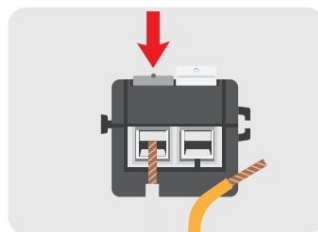

Model: UTP101 P-HD6

• The UTP101 P-HD6 is recommended for use with 24 to 22 AWG Unshielded Twisted Pair (UTP) cabling. • Individually shielded pairs should be avoided, as they drastically reduce the operating range of systems. • A multi-pair cable (25 pairs or more) with an overall shield is acceptable. • Video signals can coexist in the same cable package as low-voltage power, datacom, or telephone circuits.

Instructions:

- Take the product out of its packaging.
- Connect one of the Transceivers to the camera .
- Connect a pair of UTP cables, (Cat 5E or Cat 6 100% copper recommendation) on the transceiver side of the camera and another on the transceiver to the video recorder of your choice, with due security precautions.
- Connect a power source to the camera to energize it, and immediately, in the recorder, show the image of the camera.

UTP CAT5E/6

Use:
