II Facility

Below is a general sample procedure with a corner mount bracket:

1. Combine the two pieces of metal with the M8 hex nuts and washers.

2. Align the assembled brackets with the desired position. Align the screw holes on the brackets against the wall. Drill holes in the wall to secure the bracket and to route the cables. Hammer the anchors into the wall. Please note that these screws and wall anchors are user supplied.

x8

3. The 4 screw holes in the center are used to directly mount the camerasspeed dome PT. in the oriScrew holes on the edges are used to mount the box.power supply AA-351, AA-352, AM-718

For M6 socket screws
- for directly attached IB series bullet cameras

For M socket head screws10
- for junction boxAA-351, AA-352, AM-718
